CERTIFICATIONS

- Microsoft Certified: Data Analyst Associate with Power BI
- AWS Cloud Practitioner
- Oracle BI Foundation 10 Essentials
- Conduct Risk with Clients (2023)

Summary

IT and Data professional with experience across DevSecOps, software engineering, data governance, data quality and business analytics in enterprise banking environments. Experienced supporting Santander technology teams through SQL validation, testing, troubleshooting, deployment support and operational improvement. Comfortable working across technical and business teams to improve software reliability, data quality and delivery processes.

Experience

DevSecOps Software Engineering Analyst Santander Digital Services

Apr 2025 – Present

Málaga, Andalusia, Spain · On-site

- Contribute to the development, maintenance and continuous improvement of software engineering and DevSecOps processes within an enterprise banking environment.
- Support automated development and deployment workflows, helping maintain reliable and efficient software delivery.
- Apply software engineering and DevSecOps practices to improve application quality, security, stability and operational efficiency.
- Perform technical analysis and troubleshooting of application and deployment issues, identifying root causes and implementing corrective solutions.
- Collaborate with cross-functional teams to investigate incidents, resolve technical issues and support production-service reliability.
- Contribute to testing, release management and deployment activities, ensuring changes meet technical and operational requirements.
- Use version control, CI/CD practices and engineering tooling to streamline delivery workflows and support continuous improvement.

DevSecOps Software Engineering Analyst — External Consultant

Wimbee · External assignment at Santander Bank

May 2023 – Apr 2025

Tunis, Tunisia · On-site · Client: Santander Bank

- Delivered software engineering and DevSecOps services as an external consultant embedded within Santander Bank’s technology environment.
- Worked alongside Santander technical teams on software engineering, application operations, testing and deployment activities.
- Supported development and deployment workflows, technical troubleshooting and continuous improvement of engineering processes.
- Performed application testing and validation to support the reliability and quality of delivered changes.
- Worked across technical and business stakeholders to analyse incidents, clarify requirements and support operational delivery.

Data Analyst Intern

SIGA

Feb 2022 – Jul 2022

Tunisia

- Supported data analysis and reporting activities, transforming business data into useful analytical outputs.
- Performed data preparation, validation and analysis to support business requirements.
- Contributed to reporting and dashboard-oriented analytical work.

Selected Technical Contributions

Data Quality Engineering

Parameterized and validated SQL-based quality rules; analysed end-to-end execution behaviour; verified errors, records and execution results through SQL queries; supported data-incident remediation.

Data as a Service (DaaS)

Worked with data extraction, models, services, subscriptions and execution concepts, including planned and immediate executions and CSV/Parquet delivery workflows.

Power BI Quality Monitoring

Built analytical measures and reporting logic for execution status, latest execution dates, error volumes, recent execution trends and consecutive-error monitoring.

Java / Spark Engineering

Worked with Java and Spark-based data-quality components, including array-field validation logic, format rules, UDF-related processing and automated tests.

Technical Profile

Programming & Data

SQL · Java · Spark SQL · Hive · Impala · Data validation · Regex · DAX

Software Engineering

DevSecOps · CI/CD · Git · Maven · Jenkins · Sonar · Testing · Troubleshooting · Release validation

Cloud & Big Data

AWS · S3 · Databricks · Cloudera · HDFS

Data Governance

Data Quality · Data Governance · DaaS · Data extraction · Data remediation

Analytics

Power BI · Business Analysis · Reporting · Data Mining · Dashboard development

Ways of Working

Jira · Cross-functional collaboration · Incident analysis · Continuous improvement

Education

Professional Master in Business Analytics

Business Analytics · Tunisia

Bachelor's in Business Computing

Business Computing · Tunisia

Baccalauréat in Computer Science

Computer Science · Tunisia
